

URW TypeWorks

Version 1.0 für Apple Macintosh von 1992

Die 1972 gegründete Firma URW Unternehmensberatung Karow Rubow Weber GmbH, Hamburg, die im Jahre 1992 noch 220 Mitarbeiter beschäftigte, hatte unter der Leitung von Peter Karow das aus diversen Programm-Modulen bestehende IKARUS-System zur vollautomatischen Digitalisierung von Fonts entwickelt und hatte dann viele Jahre lang als Dienstleister für die meisten großen Schriftfirmen (Adobe, Berthold, Linotype usw.) deren Schriften digitalisiert, d.h. per Trommel-Scanner gescannt und dann per IKARUS in das extrem genaue, nämlich mit 15.000 Einheiten pro Geviert (PostScript Type 1 hat ein Geviert von nur 1000 Einheiten und TrueType ein Geviert von nur 2048 Einheiten) arbeitende IK-Format konvertiert und daraus dann **vollautomatisch** PS-Type-1- sowie TrueType-Fonts generiert. In dem über 1000seitigen Begleithandbuch "URW TypeWorks. 3000 Schriften" (ISBN 3-926515-03-1), das der URW Typeworks CD beigefügt wurde, schrieb Peter Karow als Autor dieses Buches:

"Wir haben eine **vollautomatische** Wandlung unseres intelligenten IK-Formates (II) in das T1-Format unter Berücksichtigung aller im T1-Format möglichen Instruktionen vollzogen"

Zur Digitalisierung mittels IKARUS siehe auch das Kapitel "Vom Entwurf zum digitalen Font" in "Linotype Typefaces", 1984, Seite 233-238. Wir heben diese **vollautomatische** Digitalisierung mittels IKARUS hervor, weil Fonts, die automatisch generiert werden, urheberrechtlich nicht geschützt sind (siehe <http://www.sanskritweb.net/forgers/computerprogramm.pdf>).

Als nach und nach alle alten großen Schriftfirmen in Konkurs gerieten, geriet auch URW in Konkurs, und zwar im Jahre 1995. (Die 1996 gegründete URW++ ist **nicht** die Rechtsnachfolgerin von URW.)

Die URW TypeWorks CD 1.0 von 1992 enthält exakt 500 Schriften mit jeweils 5 Modifikationen, also damit insgesamt $6 \times 500 = 3000$ Schriften. Die Schrift-Modifikationen sind für Werbefirmen bestimmt, die für Außenwerbung usw. großformatige Schilder, Plakate, Neon-Reklame und ähnliches herstellen. Interessant für normale Texte ist die Variante "Round", bei der die Serifen-Endigungen gerundet sind.

Normal	<i>ITC Jamille Black Italic</i>
Inline	<i>ITC Jamille Black Italic</i>
Outline	<i>ITC Jamille Black Italic</i>
Relief	<i>ITC Jamille Black Italic</i>
Drop Shadow	<i>ITC Jamille Black Italic</i>
Round	<i>ITC Jamille Black Italic</i>

Die CD enthält viele ITC-Schriften sowie Schriften von Letraset, Bauer (Neufville), ATF und Wagner, jeweils unter ihren Markennamen. Dagegen hatten Linotype, Monotype, Agfa und Berthold keine Lizenz zur Benutzung der Marken eingeräumt. Daher hatte URW kurzerhand die Namen geändert (siehe unten Seite 36), aber die eingetragenen Markennamen im Begleithandbuch dokumentiert.

Ulrich Stiehl, Heidelberg, 4. Dezember 2005
