

Compugraphic's List of Typeface Analogues

The Compugraphic Corporation („cg compugraphic“), founded in 1960 by William Garth in Wilmington (Massachusetts, USA. The German subsidiary was in Langen near Frankfurt am Main), was the largest manufacturer of phototypesetting machines. At the same time, Compugraphic was the largest font forging company of the pre-digital era. The cg catalogue „The Type Book“ of 1988 comprised more fonts than the catalogues of other foundries at that time. In 1989, Compugraphic was acquired by Agfa-Gevaert and ceased to exist.

The cg catalog „The Type Book“ of 1998 is highly interesting, for it includes an appendix entitled „Typeface Analogue“ („Welche Schrift heißt wo wie?“) reproduced here below on the pages 2–17.

Font forgers are notorious con artists, and therefore it is not surprising that this list of „analogues“ (forgeries) contains lies and intentional omissions. For instance, Monotype fonts do not occur at all. Every historian of typefaces knows that Monotype created the imitation font „Bembo“ 70 years ago. But in its list of „analogues“, Compugraphic makes the readers believe that „Bembo“ was designed by AM (Adressograph-Multigraph), Berthold and Mergenthaler; see below page 4 and pages 18-19.

As an irony of fate, Agfa also bought Monotype, and font forgeries made by Compugraphic are now sold under the Monotype label. For details see <http://www.sanskritweb.net/forgers/monotype.pdf>.

Ulrich Stiehl, Heidelberg, 11-June-2005

Typeface Analogue

It is a fact of life that typeface designs can change from one manufacturer to another. Design adaptations have always been present in the typographic industry. Those typefaces originally cut for handset type were adapted for metal typecasters. Then further adaptations were necessary to convert a face for use on various phototypesetters.

Through each generation, the typeface can—and usually does—have design changes. This means that typefaces we are using and specifying today are subtly different from their original rendering. Major manufacturers devote much expense and time creating accurate versions of the most popular typesyles for their customers and, in many cases, give these completed designs new names.

This alphabetically-arranged reference guide was compiled by typographic professionals to simplify the task of specifying type. The most complete and accurate listing of its kind, this guide will provide a convenient cross-reference for typographers and graphic designers of the most often used and/or confused typeface names.

Whenever a particular typeface name is associated with a line of typesetting equipment, the manufacturer of that equipment is indicated. Typesyles that are available from virtually all manufacturers by the same typeface name, such as ITC Benguiat, are omitted. Type designs that are generally available from only one manufacturer, such as Shannon from Compugraphic Corporation, are also omitted.

Guide To Abbreviations

- AI** Autologic Incorporated
- Alpha** Alphatype Corporation
- AM** AM International, Varsity Division
- BH** H. Berthold AG, Berthold Fototype
- CG** Compugraphic Corporation
- Itek** Itek Graphic Products
- Merg** Mergenthaler Linotype Corporation
