

Fonts of Corel Draw X3 (= CorelDraw 13)

Being occupied with writing other more pressing documents, I herewith supply at first a **preliminary list** of the fonts supplied with CorelDraw X3 (i.e. CorelDraw 13) published in 2006. A detailed documentation which will also include character sets and other technical details will be prepared as soon as I have more time.

Additional technical details have been added below on pages 11 through 36.

Ulrich Stiehl, Heidelberg
Apr. 2006 & Dec. 2007

Font File Name Internals

The TTF font files of the Coreldraw 13 fonts listed below contain the two following identical internal font file notes:

1. "Version 1.01 emb4-OT"
2. "Copyright 1990-2003 Bitstream Inc. All rights reserved."

Though the folder on the Corel X3 CD is labeled "OpenType_TrueType", none of the fonts are "OpenType" fonts. In fact, all fonts are ordinary plain TrueType fonts without any "OpenType" features, such as glyph substitution features etc.

The character set of the fonts below is as follows (please note that the Euro sign also occurs as generic currency sign):

File Name	Family Name	Style Name	TTF Unique ID	Full Name	Font Name (PS/PDF)
