

CorelDraw 9

List of PostScript Type 1 Fonts

CorelDraw 9 (and CorelDraw 8) contains most PostScript Type 1 fonts of all versions of CorelDraw published. For instance, CorelDraw 11 contains only 850 TrueType fonts with Western Europe Character Set 1252, while CorelDraw 9 contains 1070 PostScript Type 1 fonts with Western Europe Charset Set.

The following list comprises

1. Latin Fonts with Western Europe Character Set (page 1-21), Bitstream fonts etc.
2. Latin Fonts with Eastern Europe Character Set (page 22-23), URW fonts
3. Fonts with Mixed Latin and Cyrillic Character Set (page 24), URW fonts
4. Fonts with Symbols and other Pie Characters (page 25-26), Corel fonts etc.

For **CorelDraw 8** see below page 27-35.

Note: In this document we describe only the PostScript Type 1 fonts, but CorelDraw 9 (and CorelDraw 8) contains these fonts **also in TrueType font format**.

COMMBULL	CommonBullets	CommonBullets	COMBULL - other name

But the fonts of CorelDraw 8 do not contain the **Euro sign**, while this sign was added to the fonts of CorelDraw 9. Therefore, practically, the CorelDraw 8 fonts are the same as the CorelDraw 9 fonts with the exception of the added Euro signs. For this purpose, the generic currency symbol, ANSI decimal 164 (i.e. ¤), was replaced by the Euro sign.

Below we list the PFB font files of the **CorelDraw 8** including file length and date:
